

We care where you are!

Where you call home and **where** you are in your need for health services. **Home** might be your own residence, a family home, community living, or a facility such as assisted living. **Needs** might be recovery from surgery, managing a chronic illness, extra support to remain in the home you love, or dignity and compassion at end of life. Wherever you are, **Lake Sunapee Region VNA & Hospice** is here.

On any given day the lives of more than **675 people** of all ages (in 32+ area towns) are enhanced with our **Home Health Care, Hospice Care** or **Private Care** services. AARP reports that nearly 90% of people age 65+, an age group that continues to grow, want to stay in their homes for as long as possible. Perhaps our greatest challenge today is recruiting the staff needed to meet a growing demand when the pool of qualified applicants in our region is very limited. By far the most precious resource of Lake Sunapee Region VNA & Hospice is its people, with 80% - 85% of annual operating expenses dedicated to staff salaries and compensation. Sustaining our exceptional team requires innovation, strong organizational culture, and reliable financial resources.

After a year like no other when a pandemic reminded us that everything can change in a heartbeat, we are more confident than ever in our adaptable, competent caregivers and support staff. We are also more grateful than ever for our community and for the impact of annual giving in building the strong foundation on which we stand and will move forward.

Please consider a gift this year to our **Annual Fund**.
